TECHNICAL SEMINAR COST EFFECTIVE INSPECTION OF PRESSURE SYSTEMS

Hong Kong Branch

Institution of
**MECHANICAL
ENGINEERS**

Hong Kong Section

Improving the world through engineering

Event summary:

For those with an interest in UK legislation and guidance, Paul will give information on the HSE ageing plant program and recent guidance on Inspection. He will then present information on inspection best practice. This will include an overview of Risk Based Inspection (RBI) which offers significant benefits over conventional inspection. As well as improved risk management, typical benefits include more uptime and reduced costs. A case study on a gas processing plant will demonstrate the benefits that can be achieved with RBI.

Free of charge for IMechE and ASME Members
Number of participants is limited to 196

Speakers: Mr Paul Jackson

Date: 20 November 2015

Time: 19:45 p.m. – 20:40 p.m.
