TECHNICAL SEMINAR EVOLUTION OF POWER BOILER DESIGN & LATEST DEVELOPMENTS

Hong Kong Branch

Institution of
**MECHANICAL
ENGINEERS**

Hong Kong Section

Improving the world through engineering

Event summary:

Boiler design has developed over the years, along with Codes & Standards, as both operating pressure and temperature have increased as we strive for higher boiler efficiency. The journey involves changes to standards to improve safety as well as materials development to improve reliability. For the future to meet the ever changing market for lower environmental impact, more innovative approaches to power generation are required.

Free of charge for IMechE and ASME Members
Number of participants is limited to 196

Speakers: Mr. David Anderson

Date: 20 November 2015

Time: 18:45 p.m. – 19:40 p.m.

Venue: N003, G/f, N core, The Hong Kong
Polytechnic University, Hung Hom, Hong Kong
